

# CMPE 283 Tutorial for Project 1

## How to build and run HelloVM (tutorial\src\vmware)

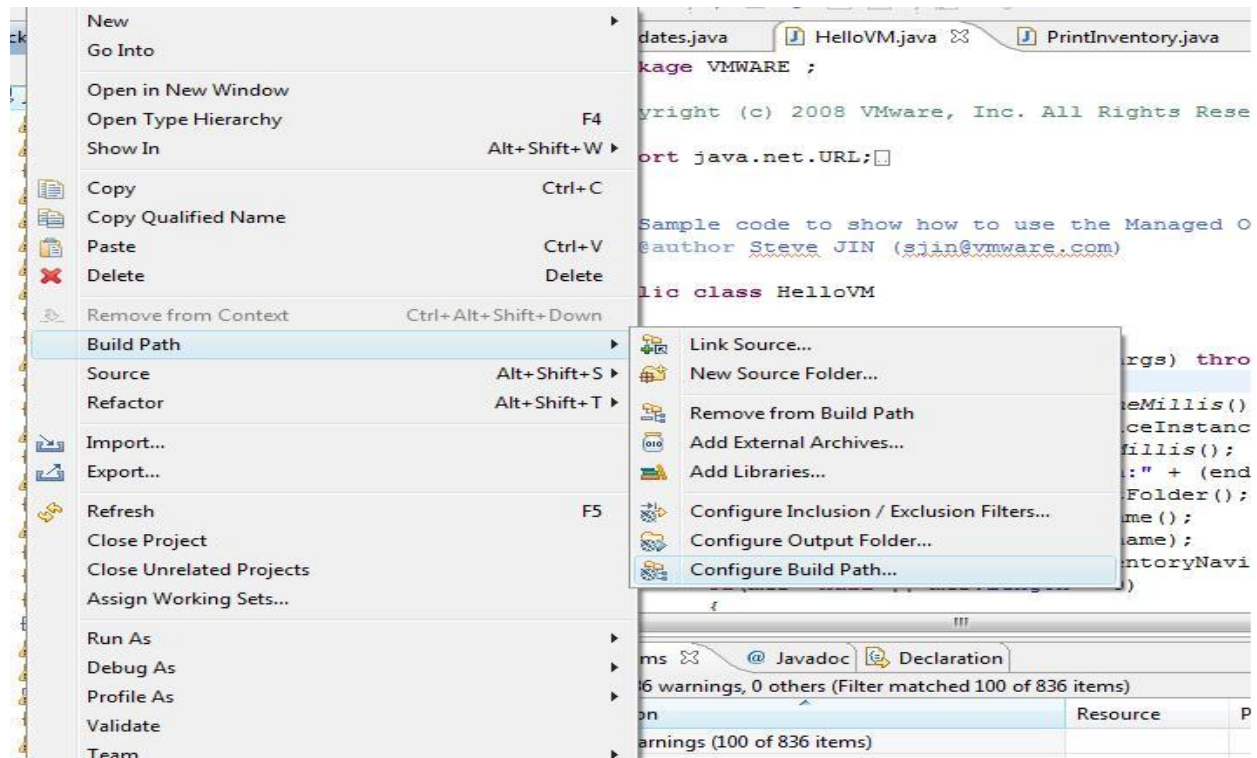

1: Create new java project in eclipse:

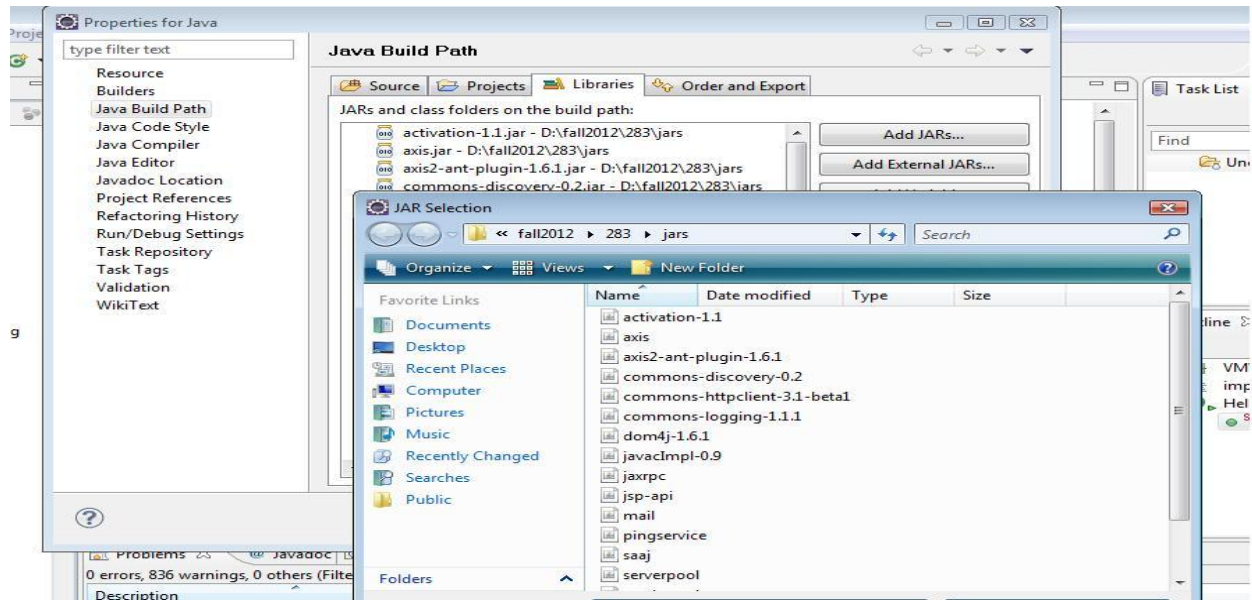

2: Give the path of src folder in the existing source option:

3: Go to configure build path option

4: Add the external jars from the jars folder (add all the jars in jars directory)

5: Run the HelloVM.java at com.vmware.vim25.mo.samples

It is at src\com\vmware\vim25\mo\samples\HelloVM.java
